## About the company

The factory was put into operation on 1 July 1932, and this is the starting point in the annals of the Gomel Fat Factory.

Gomel Fat Factory OJSC is one of the largest enterprises of oil and fat industry in the Republic of Belarus, which carries out a full cycle of processing of vegetable fats. It produces food and non-food products, recognizable and loved by consumers not only in the country, but also in the near and far abroad countries.

The company's products are supplied to all regions of the Republic of Belarus, as well as to the markets of Russia, Latvia, Lithuania, Ukraine, Kazakhstan, Moldova, Poland, Armenia, Israel, the USA, Estonia and Denmark. At the same time, the company does not rest on its laurels, constantly expanding the geography of supplies.

The main types of products manufactured by the plant are: margarine, mayonnaise, sauces, ketchup, tomato paste, mustard, sunflower oil, rapeseed oil and blended oil, solid laundry soap, toilet soap (for children, antibacterial, with additives for spa procedures), liquid soap, shower gels. There are 4 main workshops at Gomel Fat Factory OJSC: margarine, mayonnaise, soap-making and vegetable oils refining workshop.

Our production facilities for the main activities:

- ·production of margarine products (design capacity 10.5 thousand tons /year);
- ·production of mayonnaise (mayonnaise, mayonnaise sauce, mustard, tomato group, design capacity 10,000 tons/year);
- ·production of packaged vegetable oil (design capacity 10,15 thousand tons/year);
- ·production of laundry soap (design capacity 8.88 thousand tons / year);
- ·production of toilet soap (design capacity 5.1 thousand tons/ year);
- processing of oilseeds (design capacity for rapeseed and sunflower seeds 35 thousand tons / year).

Our production facilities for the main activities:

- ·production of margarine products (design capacity 10.5 thousand tons /year);
- -production of mayonnaise (mayonnaise, mayonnaise sauce, mustard, tomato group, design capacity - 10,000 tons/year);
- ·production of packaged vegetable oil (design capacity 10,15 thousand tons/year);
- ·production of laundry soap (design capacity 8.88 thousand tons / year);
- ·production of toilet soap (design capacity 5.1 thousand tons/ year);
- ·processing of oilseeds (design capacity for rapeseed and sunflower seeds 35 thousand tons / year).

All products are made from natural raw materials in accordance with state and internal standards. The enterprise has a certified laboratory. Cyclical checks are carried out at all stages of production, from incoming goods inspection to the release of finished goods for sale, with careful and mandatory quality control.

# Pripyat production site of JSC "Gomel Fat Plant"

In 1975 an inter-farm enterprise for the production of fodder "Pripyat" was established. Its main activity was the production of fodder and pelleted meal. Since 1993, the company has evolved and transformed.

In 2014, the company was renamed the production unitary enterprise "GZHK Pripyat". On 15.07.2015, it was reorganized by joining the Gomel Fat Plant OJSC with the assignment of the status of a structural subdivision "Pripyat Production Site".

The main activity of the production unit is the production of crude oils and fats, the production of oilcake and other oil production wastes as by-products, and the production of animal feeds.

The capacity of the vegetable oil production site is calculated from the daily processing of rapeseed and sunflower oil seeds and amounts to 35 thousand tons per year.

For the production of vegetable oil, the company carries out its activities mainly to meet the needs of Gomel Fat Factory OJSC

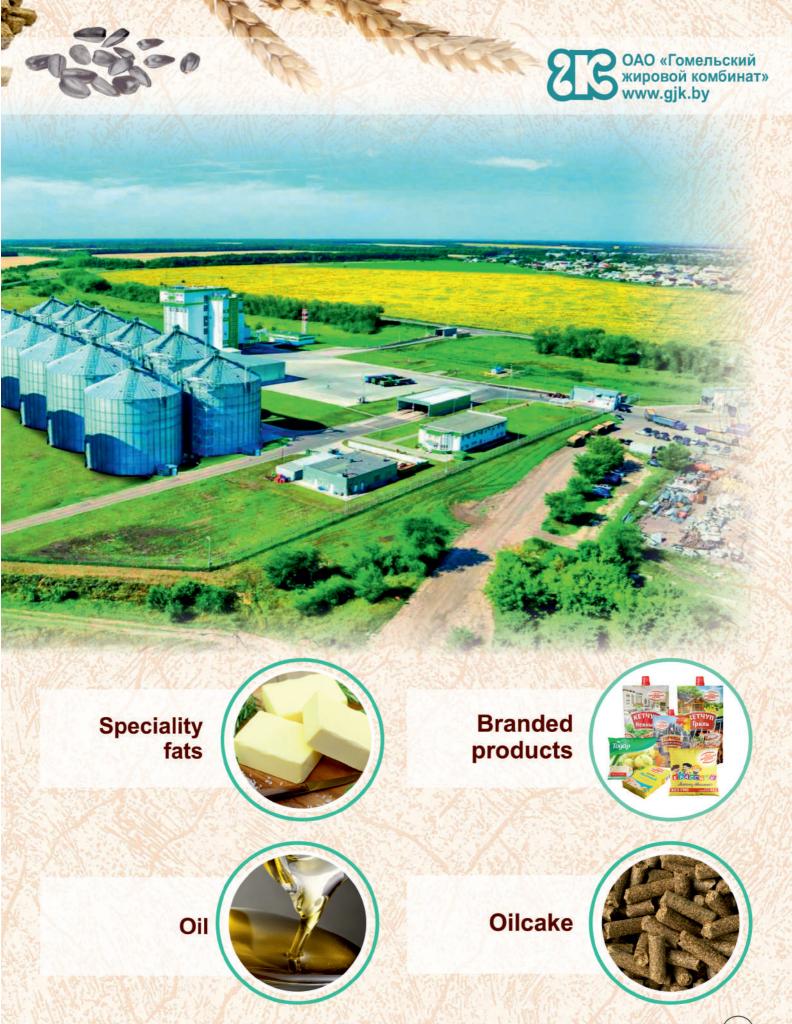

The Pripyat production site has its own certified production laboratory, which performs incoming quality control of supplied raw materials as well as quality control of the resulting products.

from + 7 ° C to + 22 ° C - 3 months.

Store at a relative humidity of no more than 75%

An environmentally friendly and safe product made from animal fats and vegetable oils.

The percentage of fatty acids in laundry soap varies from 65% to 72% and is stated on the bar itself. The higher the percentage of fatty acids, the better the soap will deal with dirt and bacteria. The laundry soap also contains a small amount of alkali to help remove dirt quickly. The use of aundry soap minimises the risk of allergic reactions due to its natural composition. Laundry soap can be used for washing plastic, ceramic, stone and metal surfaces in the home. It washes well in water of any hardness and is completely washed off with water.
